## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-39. (canceled)

- 40. (currently amended) A composition in the form of an emulsion comprising one or more carotenoids astaxanthin and/or astaxanthin esterified to fatty acid acyl groups, an aqueous diluent, an emulsifier, and one or more of the following substances: vitamins, minerals, amino acids, lipids, peptides, nucleotides and/or polysaccharides.
- 41. (previously presented) A composition as claimed in claim 40, further comprising an aqueous diluent, wherein the composition is in the liquid state.
- 42. (previously presented) A composition as claimed in claim 40, wherein one or more of the components of the composition are water soluble.
- 43. (previously presented) A composition as claimed in claim 40, wherein one or more of the components of the composition is/are fat soluble.
- 44. (previously presented) A composition as claimed claim 41, wherein the fat soluble components are in the form of micelles.
- 45. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble vitamins and one or more fat soluble vitamins.
- 46. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble carotinoids and one or more fat soluble carotinoids.
- 47. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble amino acids and one or more fat soluble amino acids.

- 48. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble minerals and one or more fat soluble minerals.
- 49. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble peptides and one or more fat soluble peptides.
- 50. (previously presented) A composition as claimed in claim 40, wherein the composition comprises one or more water soluble nucleic acids and one or more fat soluble nucleic acids.
- 51. (previously presented) A composition as claimed in claim 40, wherein the composition comprises an oil.
- 52. (previously presented) A composition as claimed in claim 40, wherein the composition comprises water soluble 1, 3  $\beta$ -glucan or 1,6  $\beta$ -glucan.
- 53. (previously presented) A composition as claimed in claim 40, further comprising cellulose, gum and or a sugar derivative.
- 54. (previously presented) A composition as claimed in claim 40, further comprising an emulsifier, preferably Polysorbate 80.
- 55. (previously presented) A composition as claimed in claim 40, further comprising a stabilising agent, preferably monopropylene glycol.
- 56. (previously presented) A composition as claimed in claim 40, further comprising a preservative, preferably phosphoric acid and/or potassium sorbate.
- 57. (previously presented) A composition as claimed in claim 40, further comprising an antioxidant other than a carotenoid, preferably ascorbyl polyphosphate and/or butylated hydroxy-toluene.
- 58. (previously presented) A composition as claimed in claim 40, wherein the inclusion of one or more carotenoid is optional.

- 59. (previously presented) A composition for enriching the diet of a captive species, wherein the composition is as claimed in claim 40.
- 60. (previously presented) A composition as claimed in claim 59, wherein the captive species are fish, preferably farmed fish, ornamental fish, or aquarium fish.
- 61. (previously presented) A composition as claimed in claim 59, wherein the composition is incorporated in feed.
- 62. (previously presented) A method for the enrichment of feed, comprising soaking the feed in a composition as claimed in claim 40.
- 63. (previously presented) A method as claimed in claim 62, wherein the feed is defrosting or defrosted.
- 64. (previously presented) A method as claimed in claim 62, wherein the feed is soaked in the composition prior to freezing.
- 65. (previously presented) A method for the enrichment of feed, comprising spraying the feed with a composition as claimed in claim 40.
- 66. (previously presented) A method for the enrichment of feed, comprising the addition of the composition as claimed in claim 40 before or during the production of processed feed.
- 67. (previously presented) A method for enrichment of feed, comprising the injection of the composition as claimed in claim 40 into the feed.
- 68. (previously presented) A method for enrichment of feed, comprising adding the composition as claimed in claim 40 to the environment or diet of live feed.
  - 69. (previously presented) A feed comprising a composition as claimed in claim 40.
